Property Due Diligence Report

hamsa layout · Case PDD-2026-0002 · Version 1 · Generated 2026-10-14T10:00:22Z

Scope and limitations. This report is an evidence-based preliminary assessment produced by an automated system from the documents supplied in the case folder. It is not a title search, not an official verification, and not a legal opinion. No statement in it should be read as confirming that title is clear or marketable, that a document is genuine, that the property is free from encumbrances or litigation, or that the property is suitable for purchase. Material conclusions require an independent title investigation and the written opinion of a qualified property lawyer.

1. Executive summary

Documents received	Analysed	Pending	Open requirements	Critical	High	Overall risk
0	0	0	14	0	0	Informational

Property: hamsa layout · Residential Plot · Purchase

Purpose: Pre-transaction document review and due diligence support.

Current status: Assessment Incomplete

- No documents have been added to this case.
- 7 statutory requirement(s) are still outstanding.

Major findings

Ref	Severity	Finding	Recommended action
R-001	INFORMATIONAL	No documents have been added to this case yet	Add the property documents to the case folder; they will be picked up automatically.

Recommended next steps

- Obtain the registered deed together with its certified copy from the Sub-Registrar.
- Apply for an EC (Form 15) covering at least the last 30 years and verify it against the title chain.
- Obtain the khata certificate and extract standing in the seller's name.
- Obtain the MR extract corresponding to each transfer in the title chain.
- Collect each earlier deed referenced in the current title document and continue backwards until the review period is covered.
- Obtain tax-paid receipts for the current and preceding years in the seller's name.

2. Property details

Recorded on the case

Field	Value
property_name	hamsa layout
address	yallapura
state	Karnataka
property_type	residential_plot
transaction_type	purchase

Consolidated from the documents

Field	Value	Status	Source
Survey number	—	Missing	Not stated in any supplied document.

Field	Value	Status	Source
Subdivision / hissa number	—	Missing	Not stated in any supplied document.
Khata number	—	Missing	Not stated in any supplied document.
Plot number	—	Missing	Not stated in any supplied document.
Flat / unit number	—	Missing	Not stated in any supplied document.
Village	—	Missing	Not stated in any supplied document.
Hobli	—	Missing	Not stated in any supplied document.
Taluk	—	Missing	Not stated in any supplied document.
District	—	Missing	Not stated in any supplied document.
Extent / area	—	Missing	Not stated in any supplied document.
Built-up area	—	Missing	Not stated in any supplied document.
Undivided share (UDS)	—	Missing	Not stated in any supplied document.
Land classification	—	Missing	Not stated in any supplied document.
Boundary - north	—	Missing	Not stated in any supplied document.
Boundary - south	—	Missing	Not stated in any supplied document.
Boundary - east	—	Missing	Not stated in any supplied document.
Boundary - west	—	Missing	Not stated in any supplied document.
Consideration	—	Missing	Not stated in any supplied document.
Registration number	—	Missing	Not stated in any supplied document.
Registration date	—	Missing	Not stated in any supplied document.

Values marked 'documented' appear in a single document and have not been corroborated. Values marked 'missing' were not found in any supplied document - that is not evidence that the underlying fact does not exist.

3. Document inventory

4. Individual document analysis

5. Ownership and title history

No transfer document on record, so no ownership timeline could be constructed.

Each step is *documented* - it reflects what a supplied document states. No step has been independently verified against the Sub-Registrar's record, and matching names across documents is not proof that the same person is involved.

6. Cross-document verification

Field	Consistent?	Values and sources
Survey number	Consistent	Not stated in any document.
Khata number	Consistent	Not stated in any document.
Plot number	Consistent	Not stated in any document.
Flat / unit number	Consistent	Not stated in any document.
Village	Consistent	Not stated in any document.
Taluk	Consistent	Not stated in any document.
Extent / area	Consistent	Not stated in any document.

7. Encumbrance and liability assessment

Preliminary automated assessment - not a legal opinion or title search

No Encumbrance Certificate is on record.

Limitations of the encumbrance evidence

- An Encumbrance Certificate reflects only what was registered against the identifiers used to obtain it, for the period it certifies.
- An equitable mortgage created by deposit of title deeds is frequently not registered and may therefore not appear.
- Unregistered agreements, family arrangements, tenancies and oral claims do not appear.
- No certificate has been verified against the Sub-Registrar's own record.

8. Legal and regulatory review

No litigation reference was found in the supplied documents. This is not evidence that no litigation exists - no court record has been searched.

What was and was not checked

- Completed: Every supplied document was read and compared against the others.
- Completed: References to litigation, acquisition, restrictions and charges inside the supplied documents were identified and listed.
- On supplied documents only: Document classification and field extraction.
- On supplied documents only: Ownership chain reconstruction.
- On supplied documents only: Encumbrance coverage assessment.
- Outstanding: Legal title opinion from a qualified advocate (An advocate practising property law in the relevant jurisdiction)
- Outstanding: Independent litigation and court records search (Jurisdictional civil courts, High Court of Karnataka, e-Courts services, revenue tribunals)
- Outstanding: Online verification of current revenue / khata records (Bhoomi portal (RTC), BBMP / municipal khata portal)
- Outstanding: Verification of deeds against Sub-Registrar records (Jurisdictional Sub-Registrar's office / Kaveri Online Services)

9. Risk register

Ref	Finding	Severity	Evidence	Potential impact	Recommended action	Status
R-001	No documents have been added to this case yet The watched folder for this case is empty, so no assessment has been possible.	INFORMATIONAL	—	Nothing has been assessed.	Add the property documents to the case folder; they will be picked up automatically.	Open

10. Missing and pending documents

A requirement listed here is something still to be obtained or done. The absence of a document is not itself proof of a defect - it means the point has not been verified.

1. Documents potentially required by applicable law

Requirement	Priority	Why / risk if absent	Where to obtain	Next action	Status
Current title document (registered sale / gift / partition / settlement deed)	Mandatory	Establishes how the current claimed owner acquired the property and is the starting point for the title chain. Risk: Ownership cannot be traced; no reliable basis exists for the transaction.	Jurisdictional Sub-Registrar's office	Obtain the registered deed together with its certified copy from the Sub-Registrar.	Pending Collection
Encumbrance Certificate covering the full review period	Mandatory	Shows registered transactions, mortgages and charges recorded against the property for the certified period. Risk: Registered mortgages, attachments or competing transfers may remain undetected.	Jurisdictional Sub-Registrar's office / Kaveri Online Services	Apply for an EC (Form 15) covering at least the last 30 years and verify it against the title chain.	Pending Collection
Khata certificate and khata extract in the seller's name	Mandatory	The khata records the person liable to pay property tax to the local body and is required for transfer and for utilities. Risk: Transfer of khata after purchase may be refused or delayed, and the property's municipal status remains unconfirmed.	BBMP / City Corporation / CMC / Gram Panchayat, as applicable	Obtain the khata certificate and extract standing in the seller's name.	Pending Collection
Mutation register extracts (MR) for each transfer	Mandatory	Mutation entries reconcile the registered transfers with the revenue record. Risk: The revenue record may not reflect the registered transfers, leaving the chain unreconciled.	Tahsildar's office / Bhoomi mutation register	Obtain the MR extract corresponding to each transfer in the title chain.	Pending Collection
Parent deeds covering the title chain for the customary review period	Mandatory	The title chain is customarily traced for about 30 years to confirm that each transfer was validly made by a person entitled to transfer. Risk: A defect in an earlier transfer can invalidate the present owner's title even if the latest deed appears regular.	The seller, or certified copies from the Sub-Registrar's office	Collect each earlier deed referenced in the current title document and continue backwards until the review period is covered.	Pending Collection
Latest property tax / land revenue paid receipts	Mandatory	Confirms the assessee of record and that no tax arrears attach to the property. Risk: Unpaid dues can become a charge on the property and delay mutation after purchase.	BBMP / Municipal body / Gram Panchayat / Village Accountant	Obtain tax-paid receipts for the current and preceding years in the seller's name.	Pending Collection

Preliminary automated assessment - not a legal opinion or title search

Requirement	Priority	Why / risk if absent	Where to obtain	Next action	Status
Seller identity and authority to transfer	Mandatory	The person executing the transfer must be the person named in the title documents and must be competent to transfer. Risk: Risk of impersonation, transfer by a person without authority, or an undisclosed co-owner.	The seller; verified against title documents and photo identification	Collect photo identification and reconcile the name, parentage and address against the title deed.	Pending Collection

2. Documents conditionally required for this property

Requirement	Priority	Why / risk if absent	Where to obtain	Next action	Status
Approved layout plan / released plan for the site	Conditional	A plot carved out of a larger parcel must form part of a layout approved by the planning authority. Risk: A revenue-layout plot may be unapprovable, unmortgageable and liable to demolition.	BDA / BMRDA / local planning authority / Town Planning section of the local body	Obtain the approved layout plan and confirm the plot number appears in the released area.	Pending Collection
Survey sketch / Tippani / Akarband	Recommended	Confirms the shape, boundaries and official extent of the survey number on the ground. Risk: Boundary and extent disputes cannot be assessed against official survey records.	Department of Survey, Settlement and Land Records	Apply for the Tippani / Akarband and the hissa sketch for the survey number.	Pending Collection

4. Documents recommended for stronger due diligence

Requirement	Priority	Why / risk if absent	Where to obtain	Next action	Status
Physical site inspection and boundary verification	Recommended	Documents describe boundaries and extent; only a measurement on site confirms them. Risk: Encroachment, access failure or a shortfall in extent may be discovered only after purchase.	A licensed surveyor; joint inspection with the seller	Arrange a survey against the sketch and confirm possession, access and the absence of encroachment.	Not Performed

5. External verification checks not yet performed

Requirement	Priority	Why / risk if absent	Where to obtain	Next action	Status
Independent litigation and court records search	Recommended	The supplied documents cannot show proceedings that the seller has not disclosed. Risk: Pending suits, injunctions or attachments may exist without appearing in any supplied document.	Jurisdictional civil courts, High Court of Karnataka, e-Courts services, revenue tribunals	Have an advocate run a search against the property identifiers and every owner in the title chain.	Not Performed
Online verification of current revenue / khata records	Recommended	Revenue records change; the supplied extract may be out of date. Risk: A recent adverse entry, attachment or mutation may not appear in the supplied copy.	Bhoomi portal (RTC), BBMP / municipal khata portal	Pull the live record for the survey number or khata and compare it with the supplied extract.	Not Performed
Verification of deeds against Sub-Registrar records	Recommended	A scanned or photocopied deed is not proof that the registration entry exists in the official record. Risk: Fabricated or altered copies cannot be ruled out from the documents alone.	Jurisdictional Sub-Registrar's office / Kaveri Online Services	Verify each registration number, date and book/volume entry against the official register.	Not Performed

6. Professional assessments still pending

Preliminary automated assessment - not a legal opinion or title search

Requirement	Priority	Why / risk if absent	Where to obtain	Next action	Status
Legal title opinion from a qualified advocate	Professional Advice	This system organises and cross-checks evidence; it does not give a legal opinion on marketability of title. Risk: No qualified professional has certified that the title is marketable.	An advocate practising property law in the relevant jurisdiction	Place the complete document set and this report before an advocate for a written title opinion.	Not Performed

Jurisdiction caveat. Requirement sets are templates for the selected jurisdiction and have not been confirmed by local counsel. Statutory applicability must be confirmed for this property and this transaction.

11. Questions for the seller or property owner

1. Can you provide current title document (registered sale / gift / partition / settlement deed)?
   Why: Establishes how the current claimed owner acquired the property and is the starting point for the title chain.
2. Can you provide encumbrance Certificate covering the full review period?
   Why: Shows registered transactions, mortgages and charges recorded against the property for the certified period.
3. Can you provide khata certificate and khata extract in the seller's name?
   Why: The khata records the person liable to pay property tax to the local body and is required for transfer and for utilities.
4. Can you provide approved layout plan / released plan for the site?
   Why: A plot carved out of a larger parcel must form part of a layout approved by the planning authority.
5. Can you provide mutation register extracts (MR) for each transfer?
   Why: Mutation entries reconcile the registered transfers with the revenue record.
6. Can you provide parent deeds covering the title chain for the customary review period?
   Why: The title chain is customarily traced for about 30 years to confirm that each transfer was validly made by a person entitled to transfer.
7. Can you provide latest property tax / land revenue paid receipts?
   Why: Confirms the assessee of record and that no tax arrears attach to the property.
8. Can you provide seller identity and authority to transfer?
   Why: The person executing the transfer must be the person named in the title documents and must be competent to transfer.
9. Can you provide survey sketch / Tippani / Akarband?
   Why: Confirms the shape, boundaries and official extent of the survey number on the ground.

12. Recommended action plan

#	Group	Action	Because	Depends on
1	Collect documents required by law	Obtain the registered deed together with its certified copy from the Sub-Registrar.	Establishes how the current claimed owner acquired the property and is the starting point for the title chain.	—
2	Collect documents required by law	Apply for an EC (Form 15) covering at least the last 30 years and verify it against the title chain.	Shows registered transactions, mortgages and charges recorded against the property for the certified period.	—
3	Collect documents required by law	Obtain the khata certificate and extract standing in the seller's name.	The khata records the person liable to pay property tax to the local body and is required for transfer and for utilities.	—
4	Collect documents required by law	Obtain the MR extract corresponding to each transfer in the title chain.	Mutation entries reconcile the registered transfers with the revenue record.	—
5	Collect documents required by law	Collect each earlier deed referenced in the current title document and continue backwards until the review period is covered.	The title chain is customarily traced for about 30 years to confirm that each transfer was validly made by a person entitled to transfer.	—

#	Group	Action	Because	Depends on
6	Collect documents required by law	Obtain tax-paid receipts for the current and preceding years in the seller's name.	Confirms the assessee of record and that no tax arrears attach to the property.	—
7	Collect documents required by law	Collect photo identification and reconcile the name, parentage and address against the title deed.	The person executing the transfer must be the person named in the title documents and must be competent to transfer.	—
8	Collect conditionally required documents	Obtain the approved layout plan and confirm the plot number appears in the released area.	A plot carved out of a larger parcel must form part of a layout approved by the planning authority.	—
9	Collect conditionally required documents	Apply for the Tippani / Akarband and the hissa sketch for the survey number.	Confirms the shape, boundaries and official extent of the survey number on the ground.	—
10	Perform external verification	Have an advocate run a search against the property identifiers and every owner in the title chain.	The supplied documents cannot show proceedings that the seller has not disclosed.	—
11	Perform external verification	Pull the live record for the survey number or khata and compare it with the supplied extract.	Revenue records change; the supplied extract may be out of date.	—
12	Perform external verification	Verify each registration number, date and book/volume entry against the official register.	A scanned or photocopied deed is not proof that the registration entry exists in the official record.	—
13	Recommended for stronger due diligence	Arrange a survey against the sketch and confirm possession, access and the absence of encroachment.	Documents describe boundaries and extent; only a measurement on site confirms them.	—
14	Obtain professional review	Place the complete document set and this report before an advocate for a written title opinion.	This system organises and cross-checks evidence; it does not give a legal opinion on marketability of title.	—

13. Final assessment

Assessment Incomplete
Overall risk level: **INFORMATIONAL** Risk score: 2.0 (0.7/100 indicative)

How this was determined: The overall level is set by the most severe unresolved finding, not by an average. The numerical score (severity x evidence reliability x whether the issue is confirmed and still open) is shown alongside it as a secondary indicator only.

- No documents have been added to this case.
- 7 statutory requirement(s) are still outstanding.

Scope and limitations

- This classification reflects only the documents supplied in the case folder. No official record, court registry or external database has been checked, and no legal opinion has been given.
- Only the documents present in the case folder at the time of this version were considered.
- Scanned copies were read as supplied; no copy was compared with an original or with the official register.
- Possession of a document is not evidence of ownership, and a revenue record is not conclusive evidence of title.
- 14 requirement(s) remain outstanding at this version.

Disclaimer. This report is an evidence-based preliminary assessment produced by an automated system from the documents supplied in the case folder. It is not a title search, not an official verification, and not a legal opinion. No statement in it should be read as confirming that title is clear or marketable, that a document is genuine, that the property is free from encumbrances or litigation, or that the property is suitable for purchase. Material conclusions require an independent title investigation and the written opinion of a qualified property lawyer.
